Interesting facts:

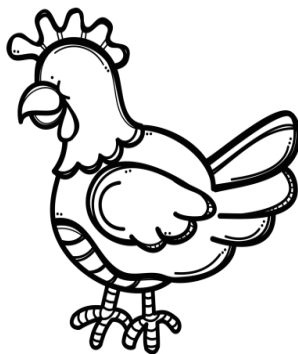

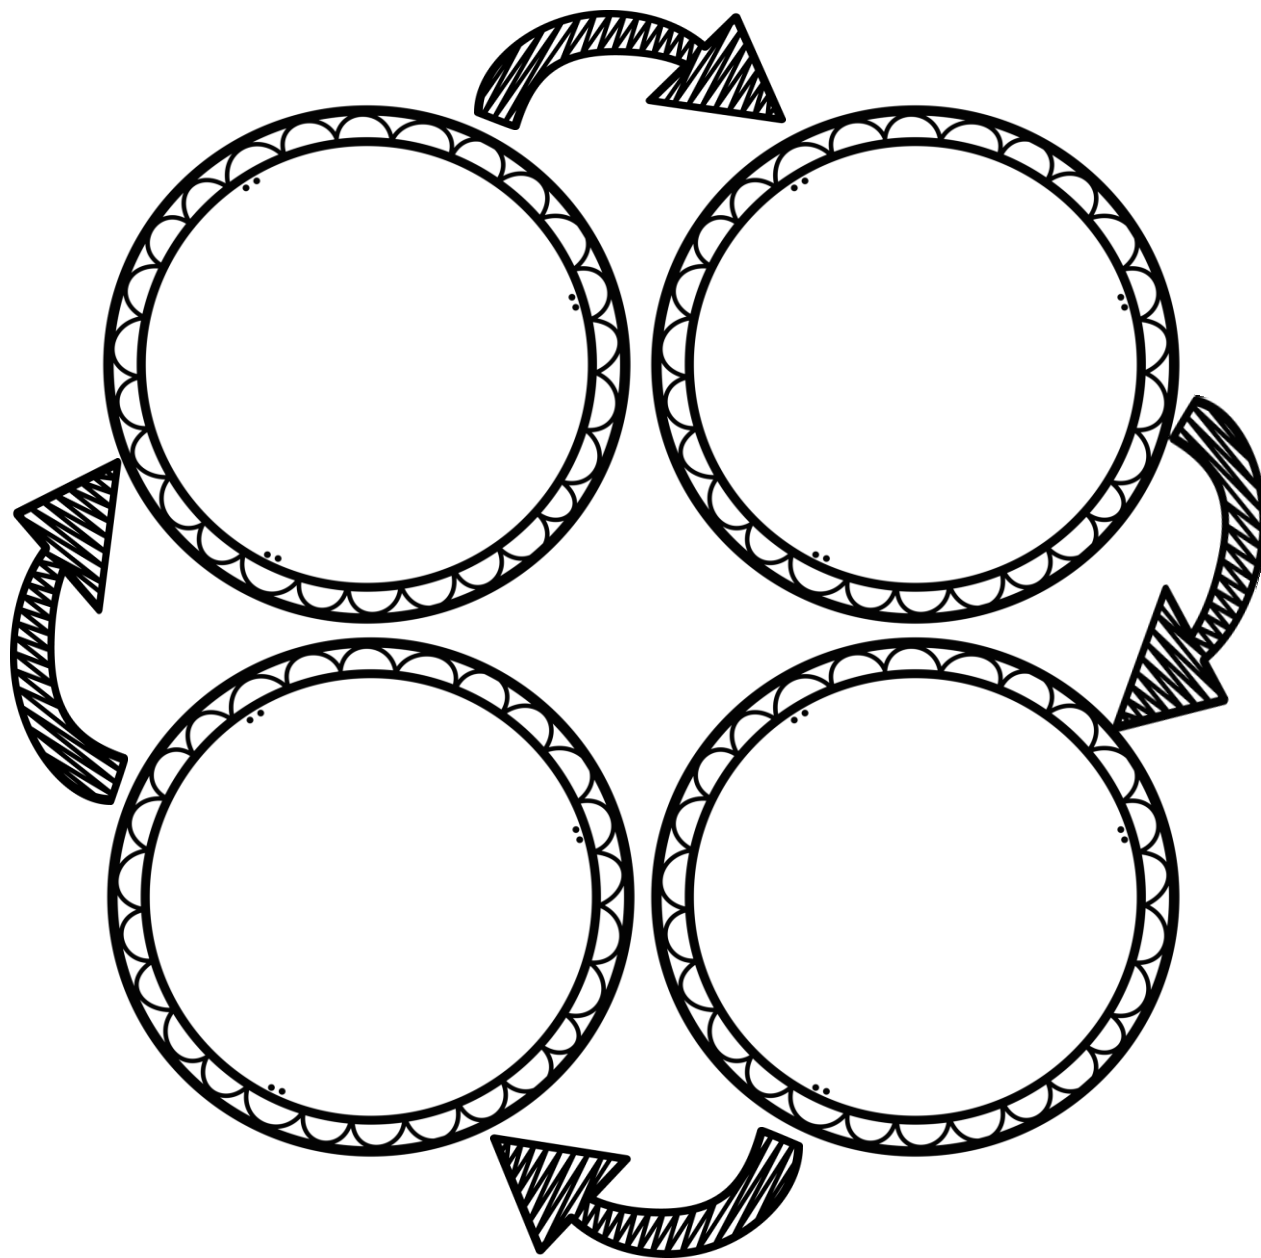

Life Cycle of a Chicken

A female chicken is called a hen. The hen lays an egg. The baby chick is inside the egg. The hen sits on the egg to keep it safe and warm. After about 20 days the egg starts to hatch. The baby chick uses its beak to break the shell and peck its way out of the egg. The chick will grow into an adult chicken and the cycle will begin again.

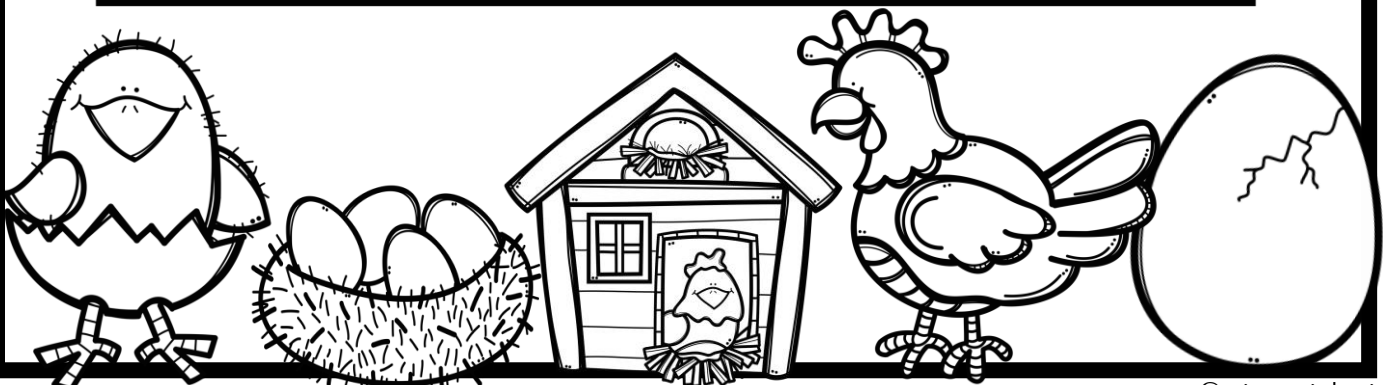

Life Cycle of a Chicken

Cloze Procedure

1. A female chicken is called a _____.
2. The hen lays an _____. The baby chick is inside the egg.
3. The hen _____ on the egg to keep it safe and warm.
4. After about 20 days the egg starts to _____.
5. The baby chick uses its _____ to break the shell and peck its way out of the egg.

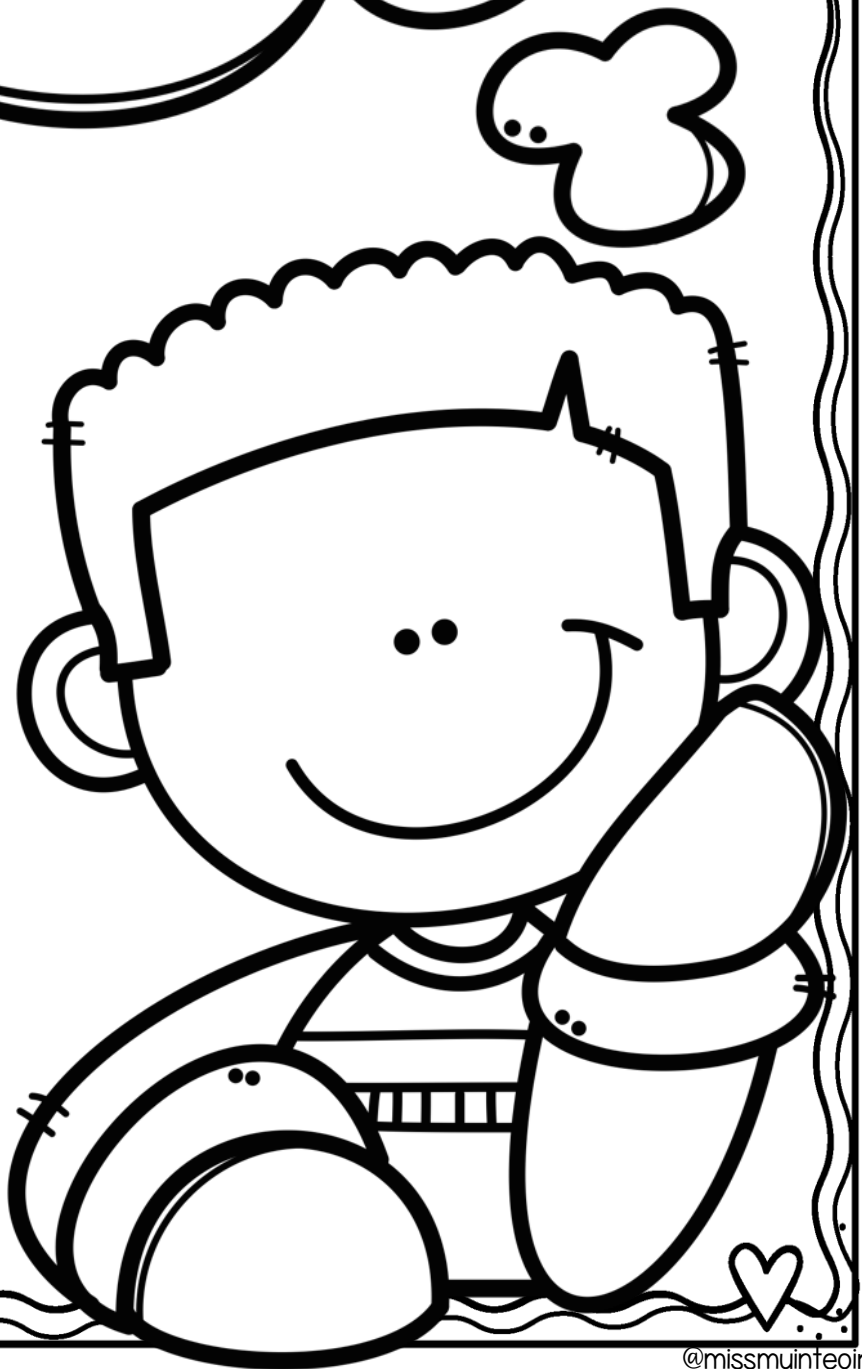

hen hatch sits beak egg
